Related records: RA-AMR-0417

## Timeline

| Time             | Event                                       |
|------------------|---------------------------------------------|
| 2026-04-02 14:05 | AMR-07 starts pallet pick in aisle 14       |
| 2026-04-02 14:07 | Fork contacts rack upright; protective stop |
| 2026-04-02 14:09 | Fleet manager flags AMR-07 as blocked       |
| 2026-04-02 14:31 | Technician clears the aisle and resets      |

## **Description**

While lifting pallet PAL-5521 the left fork touched the rack upright and the mast stopped. The pallet stayed on the forks.

No person was in the aisle. The aisle was closed for 24 minutes.

## **Root cause**

The rack face was 40 mm further out than the site map. The pick position had not been refreshed after the rack was re-bolted on 2026-03-28.
